SECTION 4: First aid measures

4.1 Description of first aid measures
General notes:
In all cases of doubt, or when symptoms persist, seek medical attention.
Following inhalation:
Remove from exposure and move to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid immediately.
Following skin contact:
Immediately wash skin with soap and plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical aid if symptoms persist.
Following eye contact:
Remove contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid immediately.
Following ingestion:
If swallowed, avoid prolonged, do not induce vomiting and call a physician immediately.

4.2 Most important symptoms and effects, both acute and delayed
Repeated exposure may cause skin dryness or cracking.
Vapors may cause eyes irritation. Vapors may cause drowsiness and dizziness.

Persons with pre-existing skin, eye, or respiratory disease may be at increased risk from the irritant or allergic properties of this material. Attending physician should treat exposed patients symptomatically.
