Introduction

Stormsure Ltd is a British business making and selling special products that are used for repairing and maintaining a huge range of **household**, **industrial** and **outdoor** items.

We help you to save money. Rather than replacing leaking shoes, wetsuits and tents, you can make your own repairs which will last for years.

Our products are for consumer, trade and industrial use. These include **tapes**, **repair kits** and **adhesives** which are used for the manufacture and the repair industries and by a large number of consumers.

We sell through wholesale distributors but you can purchase our products directly from our website.

Product uses

- **Repairing shoes and boots**
- Fixing **inflatables** and **woodwork**
- Repairing **drysuits**, **wetsuits** and **waders**
- Repairing **outdoor clothing**, **tents** and **awnings**
- **Sealing clothing** and seams to make them **water repellent**

STORMSEAL

Flexible

Repair Solutions

Quick and easy repairs with lasting results

Do you want to stop paying high prices for inflatable repairs?

Do you want to stop losing revenue because your inflatables must be sent away for lengthy repair work?

Do you want a quick, easy and long-lasting solution to wear and tear on your inflatables?

STORMSURE

is the answer!

Stormsure offers a full range of products that can be used to repair and maintain your inflatables, offering both quick temporary on-the-fly fixes and long-term repair solutions.

Our flagship products are the TUFF Tapes and the Stormsure Flexible Repair Adhesives.

Both the products after curing leave a polyurethane film that sticks to almost any material and works particularly well with PVC, leather, PU and most other man made plastics.

Both the products produce an incredibly durable layer of protection over the damaged area, yet they leave the area still flexible enough to move with the material to which it is applied. This will make it suitable for use on surfaces which require a hardy yet slightly pliable repair, such as an inflatable where surfaces move during use.

Easy to use

Use at room temperature (not below 4°C). Clean and dry the damaged area (sand the surface for best adhesion). Apply a generous amount of Stormsure Flexible Repair Adhesive to the damaged area, including at least a 5mm excess around it. Leave flat and allow to cure for 10-12 hours.

Tip: If you require the glue to cure more quickly use a damp brush or stick as the moisture from the damp will accelerate the curing process.

Storage advice

Partly used tubes store in freezer. Unopened tubes have extremely long shelf lives.

Stormsure Flexible Repair Adhesive

Quick and easy repairs with lasting results

The adhesive comes in a number of different sized tubes and can be applied to fill holes or stick together surfaces where there are rips or tears.

The adhesive begins in a liquid form similar to other glues, but with exposure to the moisture in the air, it becomes hard and resilient making it extremely difficult to tear, rip or stretch.

The glue can be used in a number of different ways:

1. To fill holes – if the bouncy castle has been pierced by something sharp causing a hole, for example by a high heel, the glue has the unique function of being able to fill holes. Place packing tape on one side of the hole and cover the hole with the glue covering the around 50mm over the edges on all sides of the hole. Remove the tape when the glue is dry and the glue will hold the hole closed.
2. To mend rips or tears – put glue on one side of the rip or tear and then stick into the other edge of the tear. Use something to hold the two edges together tightly like a clip until dry.
3. To provide a protective layer over the surfaces that are worn – one of our customers paints the glue over the inside of his bouncy castles to provide a protective layer to prevent and protect against damage.

The adhesive offers long-term repairs that will last many years. The adhesive takes 10-12 hours to adhere totally so it is a repair to be performed when the inflatable is not in use.

Waterproof Versatile Resistant

Stormsure Flexible Repair Adhesive is an extremely versatile, waterproof adhesive that comes in two colour variants of clear and black.

It is a slow-curing adhesive which takes about 12 hours to fully set, meaning you have plenty of time to perfect your repair. It is also flexible when cured, making it much more versatile and durable than your standard super glue. Flexible Repair Adhesive is perfect for fixing items which get exposed to water or need to stretch and bend to function.

This includes Wellington boots, hiking boots, sails, stand-up paddle boards (SUP's), surfboards, inflatable canoes & kayaks, trampoline mats. Despite having specific traits, it can still be used as an everyday multi-purpose glue for bonding things together such as in woodwork situations. We also sell a wide range of other branded glues, including Super Glue, Devcon, Epoxy resin, wood glue and many more....

Coming soon...

Stormsure Flexible Repair Adhesive currently comes in clear and black. Soon to be available in white and khaki in 15g tubes only.

STORMSURE FLEXIBLE REPAIR ADHESIVE 15g (CLEAR)

SKU: S1B

Contents

STORMSURE ANGLER'S SUPER GLUE 20ML BOTTLE

SKU: AG20

Contents

- 1x Stormsure Angler's Super Glue 20ml Bottle

A 20ml bottle of medium viscosity super glue.

Prices

Including VAT

Individual

£6.60

Please enquire for wholesale price list

BARCODE: 5060219660162

Description

Designed as surface non specific, so it will work on virtually all surfaces, including wood, metal, ceramics, many plastics etc. Best used on non porous surfaces. Cures in seconds. It is packaged as Anglers Glue and has full instructions in English, French, German and Spanish.

Typical Uses

Use it to repair cracks in rods, rod rings which have come loose, making up rigs, repairing floats and lures and many other things in the tackle box or at home.

STORMCURE GLUE CURING ACCELERATOR 250ML

SKU: SC250

Contents

- 1x Tin of Stormcure Glue Curing Accelerator

Prices

Including VAT

Individual

£14.99

Please enquire for wholesale price list

BARCODE: 5060219660551

Description

Mix a small amount of this accelerator with Stormsure Flexible Repair Adhesive and it will help reduce the cure time from 10-12 hours down to about 1-2 hours. Also you can use it to thin the adhesive so it may be applied with a paint brush. For waterproofing stitched seams you should make a mixture with only 25% adhesive and 75% accelerator. Mix quickly and thoroughly and paint it onto the surface. The mixture will "wick" its way into the tiny needle holes and cure inside the thread thus blocking the hole. Some drysuit manufacturers use 3 layers. The first is about 85% accelerator, The second layer is 25% and the third layer is 5% accelerator. This combination should outlast the life of the suit.

Typical Uses

Use it to pre-clean a surface and clean up afterwards.

STORMSURE SUPER GLUE PEN 5G

SKU: AG5

Contents

- 1x Stormsure Super Glue Pen 5g
- 1x Blister card & full instructions

Prices

Including VAT

Individual

£3.25

Please enquire for wholesale price list

BARCODE: 5060219660179

Description

5g of high-performance, special surface, non-specific super glue in a pen shaped bottle. The well designed tube/bottle makes is very easy to dispense small quantities. This super glue works on nearly every material and surface. It cures in about 10 seconds and is very strong. It is ideal for quick repairs to close fitting edges, where there are only the tiniest of gaps between the two sides which need joining.

Typical Uses

Ideal for rigid and semi rigid plastics, wood, ceramics as well as a huge number of other fabrics and materials.

Don't want to wait?

Accelerate Curing Time

Mix a small amount of this accelerator with Stormsure Flexible Repair Adhesive and it will help reduce the cure time from 10-12 hours down to about 1-2 hours.

Also you can use it to thin the adhesive so it may be applied with a paint brush. For waterproofing stitched seams you should make a mixture with only 25% adhesive and 75% accelerator. Mix quickly and thoroughly and paint it onto the surface. The mixture will "wick" its way into the tiny needle holes and cure inside the thread thus blocking the hole.

Some drysuit manufacturers use 3 layers. The first is about 85% accelerator, The second layer is 25% and the third layer is 5% accelerator. This combination should outlast the life of the suit.

Use it to preclean a surface and clean up afterwards.

Contents

75x Tubes of PVC
Adhesive 5g

Prices

Including VAT

Individual

£112.50

Please enquire for wholesale price list

BARCODE: 5060219661848

Description

A bag of 75 small 5g tubes containing our special adhesive for fixing PVC patches. These are great for patching over holes and leaks on paddling pools and other items made from PVC. PVC glue can also be used for a host of other jobs as it contains both a volatile solvent for dissolving pvc and polyurethane for extra strength.

Typical Uses

PVC or PVA glue is primarily used in woodwork, carpentry and handicrafts.

SUN CURE UV GLUE + TORCH ULTRAVIOLET ADHESIVE

SKU: UV15

Contents

1x Adhesive which cures
under ultraviolet rays

Prices

Including VAT

Individual

£9.59

Please enquire for wholesale price list

Description

Crystal clear, high-strength adhesive which cures under ultraviolet rays within seconds. Perfect for clear/transparent objects and surfaces such as glass and plastic. Can also cure less quickly under plain sunlight. Not suitable to bonding together opaque items.

Directions

Ensure that the surface is clean. Open cap and squeeze glue evenly onto damage or area which needs bonding. Replace cap. The glue should cure in about 10 seconds.

The glue also cures when its exposed to sunlight, but takes longer.

NEW TUFF TAPE

Durable

Repair Solutions

Quick and easy repairs with lasting results

Our TUFF Tape is a clear tape like a slightly flexible plastic film that can be applied to cover any small hole, rip or tear. It can be stuck straight onto the damaged area if it is clean and will adhere immediately if pressed down thoroughly.

It is extremely difficult to rip, stretch or puncture the tape. It acts as a protective barrier against any further damage.

The TUFF Tape is sold in different sizes and shapes to accommodate any damage you encounter. We do multi-patch sets with a selection of different size patches, from small round patches for little puncture holes to long rectangular patches for long rips. We also do longer pieces of tape and a pack of a number of 75mm round patches.

This ensures you can perform an instant fix to any sized repair you are faced with when out and about hiring your inflatables.

All in all, the Stormsure products offer a reliable and sturdy fix to damage caused to your inflatables, saving you money and time.

Just peel off a suitable sized patch and place it over a leak or rip and press it on firmly. It will stop the damage from getting worse. It will keep air in and water out.

Don't let a rip spoil your adventures

Instant repairs when you need them

Stormsure's TUFF Tape is a self-adhesive, transparent, highly conformable repair tape. It comes in strips, patches and rolls and is excellent for repairs on generally flat surfaces such as on soft top car roofs, tents, bivvies, marquees, ripped fabric, inflatable boats, inflatable pools and toys, canopies, awnings and more.

TUFF Tape is perfect for fast, easy and long-lasting repairs due to being highly multi-purpose, almost impossible to tear, abrasion - resistant and comfortable against skin. We advise every outdoor enthusiast to keep TUFF Tape handy on camping, hiking or water sports trips.

Use them on:

- Ripped waterproof clothing
- Awnings
- Tents
- Airbeds and inflatable mattresses
- Inflatable canoes and beach toys
- Cracked plastic
- Cuts on your fingers!

Patches:

- Stick to most surfaces
- Are waterproof
- Keep air in inflatables
- Are stretchy and conformable
- Are highly resistant to abrasion -
- Will go through a washing machine cycle many times

Waterproof

Typical Uses

Stormsure Zip Oil is used for lubricating stiff zips. Works well on virtually any zip, plastic or metal.

Wetsuit repair and maintenance range

NEOPRENE QUEEN

Quick and easy repairs with lasting results

NEOPRENE QUEEN

NEOPRENE
QUEEN
NEOPRENE
QUEEN

Neoprene Queen Adhesive is a fast-curing, thick, black glue. Its premium quality and properties make it perfect for repairing wetsuit and drysuit damage that regularly occurs over time with regular use. This nifty adhesive will enable you to make easy and durable repairs to rips, roles, leaks and split seams on wetsuit and drysuit material.

To use, apply to both edges of a rip and bond firmly together for 20 seconds. Within 5 minutes, it should be touch dry and you will be ready to go back in the water!

Our shampoo kills most waterborne bacteria, plankton and viruses that cause rashes and smells. Good for wet boots dry suits and all watersports equipment too.

These products are perfect for casual watersports enthusiasts as well as professional triathletes who want to stand out!

Try our anti-fog sticks

This product will stop condensation forming of glass, polycarbonate, mirrors and most shiny surfaces.

Used by Wind surfers who put dripping wetsuits in their cars, people with wet dogs in their cars. Great for SCUBA diving goggles and masks and motorcycle helmet visors, spectacles and sunglasses. Ideal for both caravaners, paintball and airsoft gamers who need crystal clear vision. Works well on bathroom mirrors too! Also available in a liquid form.

Watersports, Diving

Repair Kits

Repair Kits for every Occassion

Quick and easy repairs with lasting results

The contents of our repair kits have been carefully selected to match the job at hand. Including waterproof glue, super strength self-adhesive tape and extras, our kits contain everything you need to carry out high quality, durable repairs to a variety of gear. We offer all-in-one bundles for a wide range of outdoor-related repairs such as waders, tents, inflatables, tyre inner tubes, horse rugs, sails, canoes, latex wetsuit seals and more.

For instant repairs to punctures and splits on generally flat surfaces, clean the surface and apply a TUFF Tape patch or strip directly onto the damage. Rub with a smooth, hard object to ensure best adhesion and least air under the patch.

For damage in awkward or hard to reach areas, clean the damaged area (sand for best results) and apply Stormsure Flexible Repair Adhesive directly onto the damage, leaving a 5mm excess overlapping around it. Leave flat and allow to cure for 10-12 hours.

Multi Purpose
Inclusive
Convenient

For use with:

- Boot, Shoe and Waders
- Inflatables and Pools
- Tents and groundsheets
- Outdoor Clothing
- Inflatable canoes and beach toys
- Horse Rugs
- Wetsuits and Drysuits
- Cuts on your fingers!

Plus much much more

Durable water repellent

Quick and easy protection, great results

Stormproof is a water-based, non-toxic durable water repellent (DWR) that is applied by spraying using a convenient finger trigger. It is intended for use on outdoor clothing and equipment and effectively repels water, oils and soils from most surfaces including nylon, polyester, cotton, wool, leather, synthetics, tweed and even wood and concrete! Once an item has been treated correctly, water will ball up and roll off, instead of wetting out the surface, causing you to get wet and cold. Unlike some waterproofing sprays, Stormproof does not have a nauseating chemical smell and can be used in any environment.

STORMSEAL SEAM SEALER 100ML

SKU: OSEAL

Contents

- 1x** Stormseal Seam Sealer in a 100ml squeezable bottle w/ foam pad

Prices

Including VAT

Individual

£6.99

Please enquire for wholesale price list

BARCODE: 5060219661749

Description

Stormseal is a water-based seam sealing liquid that comes in a squeezable bottle with a foam pad that enables the user to apply the product evenly.

Typical Uses

Waterproofing seams and needle holes on tents, bivvys and anything else that has non-watertight seams.

Directions

Spray Stormproof Durable Water Repellent onto the surface evenly, getting the best coverage possible.

Allow to fully air dry or use a radiator before use. Enjoy remaining warm and dry!

STORMSEAL SEAM SEALER 5L

- About 2 garden benches

1L litre bottle

Keep this stored, ready for refilling used spray bottles.

This Stormproof variant can proof.....

- 5 litre jerry can
- 25 litre can
- 25 litre concentrate

Dilute with 100 litres of deionised water to make 125 litres of Stormproof

1L spray bottle

*Our largest and best value spray bottle.
Perfect for family outdoor expeditions!*

This Stormproof variant can proof.....

- About two small tents
- Family-of-four's outfits
- About 20 beanie hats
- Large concrete area (approx 10 large flower pots)

Spray on or wash in

As StormProof dries on a fabric it leaves a very thin layer of active chemical over the fibres. This dramatically increases the difference in surface tensions between the fibres and the water droplet. This creates a high contact angle on the droplet. The treated surface has a chemistry which is hydrophobic (it repels water) so the water drop rolls off, leaving the fabric dry and breathable.

Particles of dirt often lie loosely on the surface and as the droplets of water roll off the fabric the dirt particles are picked up by the droplet and carried away. So StormProof also has the added benefit of repelling dirt and oil too.

StormProof works well on most materials:

- All technical fabrics.
- Nylon fabrics.
- Synthetic and Coated fabrics.
- Leather and Natural materials.
- Canvas / Tarpaulins.
- Wood / Masonry.

The fluorine polymer chemistry used in StormProof DWR exhibits extraordinarily low surface tension. Solid surfaces coated by StormProof resist not only water-soluble liquids (such as water, coffee, or milk) but also highly-active and aggressive liquids such as oil, alcohol, and petrol.

Fluorinated water/oil repellent agents are recognized as superior to wax or silicone agents because of their superior stability and durability in real-world conditions.

The bottom image shows how the dried hyper branched polymers in StormProof DWR coating works on an individual fibre.

Safety:

Do not put StormProof in your eyes or breathe in the aerosol spray. StormProof contains no PFOA, PFOS or APEO.

Free of perfluorooctanoic acid (PFOA*), perfluorooctane

*Outdoor Clothing, Horse Rugs, Car Soft Roof Fabric

Accessories

GREASE WITH PRECISION DISPENSER 30ML

SKU: OGREASE

Contents

1x Precision Lubricating
Grease bottle 30ml

Prices

Including VAT

Individual

£5.49

Please enquire for wholesale price list

BARCODE: 5060219661756

Description

A small concertina bottle containing top quality lubricating grease. It fits into the palm of your hand and is very easy to use and still stay clean. The nozzle fits onto the top with a Luer lock attachment and allows you to dispense the smallest quantity of grease and place it in exactly the right place.

Typical Uses

The grease will continue working at high temperatures, and, unlike oil, remains thick and in place where it is needed even as the machinery works and warms up.

PACKTACH CARABINER CLIPS FOR TENTS & BACKPACKS 2-PACK

Contents

2x Stormsure Packtach
Attachment Points

Prices

Including VAT
